Tools: Power BI, SQL Server Management Studio, MySQL.

Platforms: Visual Studio Code, Share Point, Power Automated.

Professional Experience

➢ **Kiran Hospital – Current working as Full Stack Developer** **Dec 2024**

- Developed and maintained scalable web applications using Laravel and React, improving application performance by 15% and reducing loading times by 20%.

- Designed and implemented OPD Assessment v2, a patient management system, streamlining patient data processing and enhancing user experience.

- Built a Candidate Resume Tracker to automate resume screening and shortlisting, reducing hiring time by 30%.

- Created an Employee Benefits System to manage and track employee perks, improving transparency and employee satisfaction.

- Developed a Dermatology Management System to optimize patient record-keeping and treatment scheduling for dermatology departments.

- ➤ **Invica Infotech – ASP.NET Intern**   **April 2024**
  - Developed and maintained scalable web applications using .NET, improving application performance by 15% and reducing loading times by 20%.
  - Collaborated with cross-functional teams to deliver high-quality software solutions.
  - Designed and implemented a Job Portal website using HTML, CSS, JavaScript, ASP.NET Razor Pages, and Bootstrap for an interactive and responsive user interface.
  - Integrated features like user registration, job listings, search functionality, and an admin panel using ASP.NET, optimizing backend processes and improving system performance.

- ➤ **Can't Tech** - **Data Entry**   **Jan 2023**
  - Managed and updated large datasets efficiently, improving data retrieval speed by 25% through optimized processes.

Projects:

HR Digitalization System   Mar 2025

- • Kiran Hospital
- ➤ Developed using Laravel, React, Breeze, and Inertia.js.
- ➤ Replaced manual HR processes with modules for employee records, candidate records, and employee and employee depended Medicare management.
- ➤ Improved workflow efficiency and record accuracy.

OPD Assessment System   Fab 2025

- • Kiran Hospital
- ➤ Built using Laravel, React, and Inertia.js to digitize internal operational assessments.
- ➤ Enabled department-wise assessment tracking and real-time reporting dashboards.

Real Estate Management System: [Click here]   Nov 2024

- • M.Sc. (ICT) 3rd Sem Project
- ➤ Developed a Real Estate Management System using PHP and MySQL, providing a platform for users to buy, sell, and rent properties.
- ➤ Implemented key features like property listings, search filters, user authentication, and an admin panel for managing properties and user data.
- ➤ Used HTML, CSS, JavaScript, Bootstrap, and XAMPP to ensure a responsive and dynamic user interface.
- ➤ Integrated MySQL for efficient database management and smooth handling of property details and user transactions.

Job Portal: [Click here]   Mar 2024

- • M.Sc. (ICT) 2st Sem Project
- ➤ Built a Job Portal using ASP.NET MVC to help job seekers and employers connect easily.

- ➢ Added features like user login, job listings, and a search option so job seekers can find and apply for jobs.
- ➢ Created an Admin panel for employers to manage job posts, track applications, and see activity stats.
- ➢ Made the portal mobile-friendly and responsive using Bootstrap for a smooth user experience across devices.

Online Shopping System: [Click here](#)   **Dec 2022**

- • BCA Final year Project
- ➢ Created an e-commerce platform using PHP and MySQL, enabling seamless online shopping experiences.
- ➢ Built a shopping website with features like product listings, shopping carts, and order management.
- ➢ Used HTML, CSS, JavaScript, Bootstrap, and XAMPP to ensure a responsive and interactive user interface.
- ➢ Integrated MySQL for managing product data and user transactions.
